URSERYMEN TO MEET IN ATLANTA NEXT YEAR

Educational Campaign Planned to Encourage Better Care of Trees.

na association, which embraces all the southern states, today elected Niles as next year's meeting place. A work of a three-day session was allowed into two days of interesting proceedings and adjournment was postponed to the following day. The list of officers as follows: President, I. M. Smith, Knoxville, Tenn.; vice, Harry Nital in St. Michaels, Tenn.; secretary-treasurer, O. J. Henry, Pomona, N. C.

Chase, Ala.; O. Howard, of Pomona, and O. W. W. of Memphis, Tenn. were appointed to prepare literature with which to conduct an educational campaign. The plan of making public through a part of the card distribution scheme, encouraging more home thrash and the better caring for the thrasher. It is hoped that in so doing a demand for nursery products will be created. The plan is the attainment of nursery business as a whole, and the better care of the fruit of the general business depression.

BRITISH BOMBARDMENT CAUSED GREAT DAMAGE

Amsterdam, Holland, August 24.—London, August 24.—A large number of British soldiers were killed in the bombardment of Zebrugg, Belgium, and about half the material damaged was brought to daylight. It was reported that the material damage done apparently was very great. The Zebrugg was completely destroyed and with it some of the other buildings.

STORM KILLS FOURTEEN AT CAPE SAN ANTONIO

Tampa, Fla., August 26.—Fourteen persons met death near Cape Soto, Antonio, Cuba, and the powerful wireless station there was badly damaged and made unfit for immediate use by the recent tropical hurricane, according to a story told today by H. O. Borden, captain of the schooner Caroline Vought, which arrived last night. He also reported that it was necessary to beach a fruit schooner when her cables

The only white inhabitants at Cape San Antonio are employees of the United States Fruit company stationed

there to maintain and operate the high-power wireless station. Very few natives live near the western tip end of the island, as the soil is not fertile there. The station has been cut off from communication since the storm.

advance payments to out-of-town local car-
riers, dealers or agents.

GERMAN PROBLEM SOLVED.

When the last American note relative to the sinking of the Lusitania was dispatched to Germany, more than a month ago, The Constitution pointed out that our differences with the country were far more serious than those with England relative to that country's blockade of neutral European ports against our commerce.

Moreover, we called attention to the fact that Germany had practically conceded our demands in the actual conduct of her submarine warfare, inasmuch as following the first Lusitania note, no further submarine attacks without warning were made upon passenger ships carrying neutrals.

The recent sinking of the Arabic, with the loss of two American lives, seemed antagonistic to this conclusion; and yet we could not feel that after so many weeks of careful conduct of her submarine campaign, when better opportunities for it had been time and again presented, Germany had at last determined to flout us by an act which, if deliberate, must unquestionably have caused a serious breach between the two governments.

When announcement came of the sinking of the Arabic, as serious as the incident appeared, The Constitution was first to counsel calmness and careful inquiry into all the facts, and from both viewpoints. The wisdom of that advice is now more than apparent. We are given to understand in a specific statement from the Imperial German Chancellor von Bethmann-Hollweg that if the circumstances of the sinking of the Arabic were comparable to those surrounding the Lusitania the commander of the German submarine violated his instructions and Germany would make reparation accordingly.

The Imperial chancellor's statement upon this point is of interest not only as indicating in the strongest possible manner that Germany does not desire a breach with the United States, but as signifying Germany's accordance with our views as to the conduct of marine warfare where neutrals are concerned. The significant feature of his statement is as follows:

Only after all these circumstances have been cleared up will it be possible to say whether the commander of one of our submarines went beyond his instructions, in that he deliberately violated the principles involved in the sinking of the Lusitania, and the indications are that he will not hesitate to do it in a manner that will be entirely satisfactory to the United States.

Germany's accession to our views of the Lusitania disaster, based upon recognized international law, will go a long way toward restoring the friendship of the two countries to a basis, if anything, even firmer than that which existed prior to the outbreak of the European war.

With the removal of the German problem, whose solution is now in full sight, the way is better cleared than ever for the com-

position of our differences with England, which country has dealt a serious blow at one of the foremost of our industries. England is just as wrong in declaring cotton contraband, and in blockading neutral European ports against our non-contraband commerce, as Germany is in sinking the Lusitania. We should be equally insistent in the one case as in the other.

The present difference between the two cases is that Germany has receded, while England persists. It is not difficult to see which of the two countries is inclined to be "deliberately unfriendly."

PLENTY OF COTTON MONEY.

Indications point to the fact that there will be more money available for loans on cotton this fall than ever before in the history of the south—a condition undoubtedly made possible through the establishment of the federal reserve financial system.

The federal reserve banks were the first to announce that they are prepared under reasonable conditions and restrictions to finance the cotton crop. The conditions are comparatively simple. They require safe storage, a satisfactory warehouse receipt and adequate insurance. These conditions complied with, they will not hesitate to advance through their member banks, 75 per cent of the market value of the cotton offered as collateral at a rate of interest as low or lower than has heretofore obtained.

Almost concurrent with the announcement of officials of the reserve banks in the cotton-growing sections, Secretary of the Treasury McAdoo stated he would be glad to place with the three reserve banks in the cotton belt \$10,000,000 in gold without interest, to be used in making cotton loans. Secretary McAdoo's decision to place this money without any interest charge to lend it through their member banks at the lowest interest rates.

The Atlanta reserve bank, one after another, with the federal reserve system at their backs, are proposing to lend money on cotton at the rate of 6 to 7 cents per pound and at an interest charge of only 8 per cent per annum. They will do this, of course, through their correspondent banks in Georgia and neighboring states, but in a manner to enable the producer to secure a maximum loan upon the most liberal terms.

The Central bank, the Fourth National and the Third National have announced they will make extensive cotton loans. It is not to be questioned that other Atlanta banks will join them, and that possibly by the time the cotton movement is well under way hundreds of banks over the south will have placed their resources at the disposal of the cotton producer upon the same basis. Thus it is evident there will be no lack of money in the south this year to take care of cotton upon a basis which must be entirely satisfactory to the producer. He will be able to meet all of his present obligations, to take care of himself, and to hold his cotton until such time as market conditions warrant his disposing of it.

ATLANTA'S UNFORTUNATES.

As surprising and shocking as are disclosures regarding the extent of the narcotic drug habit in Atlanta, incident to the efforts to enforce the Harrison law enacted by congress to prevent the indiscriminate sale of such drugs, the problem is not one beyond Atlanta's power to cope with, if handled in the right way.

It is almost impossible to believe that 2,000 persons in this city, one per cent of the total population, are drug addicts; and yet this is the disclosure of the census made in connection with the enforcement of the Harrison law. The large percentage of them are, it is stated, negroes who use cocaine; nevertheless, if deprived suddenly of the drug to which they have become long accustomed, their condition would be even more desperate than that of the average man deprived of food.

It is certain that something must be done to prevent the rapid spread of the drug habit. The Harrison law has been devised to this end; but it is essential that there shall be certain relaxation in its enforcement until the drug habit has been eliminated. It should, and doubtless will, be rigidly enforced to the extent of preventing others from becoming drug users, but it must be relaxed at least to the extent which will permit the emancipation of present addicts from their habit.

Unfortunately, those charged with the enforcement of the law fully realize this necessity, and are endeavoring to make provision for it through opening the city contagious disease camp, which is not now in use, for that purpose, as a drug treatment station.

If one place in the city is provided where drug addicts may be given the "tapering off" treatment as long as they need it, and it is definitely known that all other sources of procuring drugs are closed to them, it is quite possible that the larger percentage of Atlanta's drug addicts may be restored to self-control.

To accomplish this there is needed careful, humane and generous treatment from the government, carried well beyond the period of apparent recovery. That this is the official intention there can be no question. If carried out, and if sources of drug supplies are then permanently closed, much should be accomplished in the reclamation of those now upon the road to a living death.

Grand Duke Nicholas is getting full credit for his masterful summer retreat to winter quarters.

The Washington Times says that "one way to look at the European situation is over the top of a slice of watermelon."

At the celebration of the reported Riga victory Petrograd naturally took water in her.

JUST FROM GEORGIA

By PAUL L. JOHNSON

The Old Thanksgiving Feeling.

I. Like a breath of winter stillness
Violet feels the chilly
But the old Thanksgiving
feeling
Is a coming over you
You're snug now from your dream
(Ain't the country lookin' prime?)
On the fire the kettle's steamin'.

(Oleed, where's yer tiddy-timer?)
II. Every fiddlehead hints of glories
Coul'd at yer hook an' call;
(Some one tell the winter stories
That are sweeter still of all.)
All the hard times would be
Storms have left the sky true-blue,
An' the old Thanksgiving
feeling
Is a-comin' over you.

III. Language Has Limits.
The society editor of the Rushville (Ind.) News thought it was high time to celebrate a marriage like this:
The bride and groom presented a regal spectacle, never equalled since the proud Empress sailed down the perturbed lotus-leafed Nile in her gilded pageant to meet Mark Antony while all the world stood agape at the unheard of triumph. To describe the bride's costume begins the English language and imagination fails faint and feeble before the marvels of the East. She was gorgeously arrayed in a calico house dress and a pair of lace curtains floated like a dream about her figure.

IV. An Assured Future.
The River saw the fisherman
Go down, without a quiver,
And murmured: "Now I've got my wish:
He was the chap that said the fish
Were bigger than the river?"

V. Uncle Jules Says—
I AM UNDER THE
IMPRESSION THAT MY
BOARD BILL WILL BE
CONSIDERABLY LONGER
THAN MY STAY AT THE
SEASHORE.

VI. The Earth-Grabbers.
As to people taking more of the earth
than they know what to do with a county
correspondent of The Campbell News is re-
minded of the story of the dog and the rail-
road train:
"The countryman and his wife lived near
the railroad and the dog persisted in
chasing the train. The old man was reading;
the old woman was chasing the train;
the dog, as usual, and she remarked to her hus-
band:
"I wonder why that dog runs after that
train so much?"
Said the old man: "I don't know, but
I've been a wonderin' what in the h— he'd
do with it if he killed it!"

VII. An Autumn Spread.
Hot for the autumn
A-comin' along,
Silver-sweet, trumpet,
That thrill, out a song,
Spread ye the table,
With the greatest and best,
After God's blessing,
The world at the feast!

VIII. The Mountain Spout Pipe.
From a communication "Tubercular" to
The Murray County Messenger, looking
forward to the extra legislative session:
"Gotten won't grow in this mountain, and
now we can't raise hogs, cattle nor wool.
They want us to starve and freeze to death in
the winter, die of rattlesnake bites, without
whiskey, in the summer, and be ripped open
with wild cats every day to the year. It
ain't right."

IX. I was in the war with my gun,
and had plenty of beef and warm clothes,
and the land legislature would have
been a good deal of help with wild cats and
rattlesnakes and no liquor at all!"

X. The Harvest Herald.
Harvest Herald says, says he:
"Summer long you prayed for me;
As you tended well the soil
Prayer was perfect made by toll.
Here I stand, and in my hand
Gleams the gold to crown the land;
Open wide the friendly door,
Throw some white sand on that floor;
Here's the fiddler, come to play:
"Hand all round this day of day!"

XI. The Brighter Vision.
Always saw the bright day
"Comin' right along in
Didn't raise the chorus
Of a tribulation song
Sung enough, the bright day
Made his dreams come true,
Saying, "Haven sent me
To show the way to you."

XII. To the Missing Birds.
I.
The bluebird will come to my window in
spring
And warble his wild sweet notes;
The mockingbird even in winter will sing
When a dream on the south-wind floats:
The thrush and the wren will sing and say
Will sing 'er the snow melts away,
And the tuxey Jaybird is bound to be heard
In the woods when the leaves are green:
But gone from the land is the little sparrow,
Once the source of such innocent joy,
And where, oh where, is the woodpecker he,
And the bluebirds I loved when a boy?

II.
The sparrow still chirps from peep of the
"Till shadows of evening fall
When Chuck-will-widow whistles all and forlorn
Respond to quaint Whippoorwill's
Whistling Bob White with cheering delight
The little blue bird, the little blue bird,
"Most green woodland trees there float on
the breeze
But gone from the land is the little sparrow,
Once the source of such innocent joy,
And where, oh where, is the woodpecker he,
And the bluebirds I loved when a boy?"

ERNEST NEAL
Caldwell, Ga., Aug. 25, 1915.

XIII. The Brighter Vision.
Always saw the bright day
"Comin' right along in
Didn't raise the chorus
Of a tribulation song
Sung enough, the bright day
Made his dreams come true,
Saying, "Haven sent me
To show the way to you."

XIV. The Brighter Vision.
Always saw the bright day
"Comin' right along in
Didn't raise the chorus
Of a tribulation song
Sung enough, the bright day
Made his dreams come true,
Saying, "Haven sent me
To show the way to you."

XV. The Brighter Vision.
Always saw the bright day
"Comin' right along in
Didn't raise the chorus
Of a tribulation song
Sung enough, the bright day
Made his dreams come true,
Saying, "Haven sent me
To show the way to you."

XVI. The Brighter Vision.
Always saw the bright day
"Comin' right along in
Didn't raise the chorus
Of a tribulation song
Sung enough, the bright day
Made his dreams come true,
Saying, "Haven sent me
To show the way to you."

XVII. The Brighter Vision.
Always saw the bright day
"Comin' right along in
Didn't raise the chorus
Of a tribulation song
Sung enough, the bright day
Made his dreams come true,
Saying, "Haven sent me
To show the way to you."

XVIII. The Brighter Vision.
Always saw the bright day
"Comin' right along in
Didn't raise the chorus
Of a tribulation song
Sung enough, the bright day
Made his dreams come true,
Saying, "Haven sent me
To show the way to you."

The Holland Letter

By HENDRIK HUDSON

By GEORGE FITCH,
Author of "At Good Old Hiram."

Hendrik Hudson was a fearless navigator who sacrificed his life in the interests of geography and died a disappointed man because he wanted to find a northwest passage to China which would have been capital in sought in that city for the purpose of organizing a steamship line which would operate between Boston and the Pacific coast. The summer of 1609 he was here, and he has heretofore been occupied with railway transportation. His executive duties entailed an occasional appearance playing golf between New York and Boston. He is the executive whom Charles B. Mellen brought from Minnesota to Boston to aid Mr. Mellen in carrying out great plans for the unification of the New England railroad situation.

Mr. Byrnes must have been familiar with steamship navigation through the Great Lakes and perhaps gained by that experience knowledge which will make it all the easier for him to persuade Boston capital that the opportunity is excellent for establishing a steamship line operating between the Atlantic and the Pacific coast by way of the Panama canal. Reports have been circulated that the managers of a steamship company which has long been engaged in commerce between New York and the Pacific coast by way of the Panama isthmus and the railroad which crosses that isthmus have found it expedient to sell some of its steamships and to use the proceeds in making recommendations to congress in favor of modification of that law, should he find this advisable, certain facts will be brought to his attention which will reveal the magnitude of shipbuilding operations in the United States. Those who control shipyards do not desire to see the law of the Pacific coast to be so strict that they will be unable to build ships, but those who own and navigate ships, who will be affected, if there is any adverse effect by the law of the Pacific coast.

Shipbuilding Progress.
Two or three years ago American shipyards began to be built, occupied, partly because the belief was general that the opening of the Panama canal to navigation would greatly stimulate commerce. The advent of the European war seems not to have affected the shipbuilding business in the United States. The statistics which President Wilson will have at hand will show him that American shipyards are the largest of this year, under construction vessels designed for seaboard navigation built of steel or iron aggregating sixty, with a gross tonnage of over 1,000,000 tons, and that the president will have more striking figures than these before him when the details of the construction of vessels which are to navigate the Great Lakes are laid before him. As the so-called "Boo" canal has now for some years floated a greater tonnage than any other ship canal in the world—greater even than that of the Suez canal—also ship construction and the navigation of the Great Lakes represent the largest part of that in American waters.

Great people regard what important part the Great Lakes represent in the shipping industry in the aggregate of American commerce. The statistics which will be brought to his attention which will reveal the magnitude of shipbuilding operations in the United States. Those who control shipyards do not desire to see the law of the Pacific coast to be so strict that they will be unable to build ships, but those who own and navigate ships, who will be affected, if there is any adverse effect by the law of the Pacific coast.

The advent of the European war seems not to have affected the shipbuilding business in the United States. The statistics which President Wilson will have at hand will show him that American shipyards are the largest of this year, under construction vessels designed for seaboard navigation built of steel or iron aggregating sixty, with a gross tonnage of over 1,000,000 tons, and that the president will have more striking figures than these before him when the details of the construction of vessels which are to navigate the Great Lakes are laid before him. As the so-called "Boo" canal has now for some years floated a greater tonnage than any other ship canal in the world—greater even than that of the Suez canal—also ship construction and the navigation of the Great Lakes represent the largest part of that in American waters.

PONDEROUS PERSONAGES

HENDRIK HUDSON

By GEORGE FITCH,
Author of "At Good Old Hiram."

Hendrik Hudson was a fearless navigator who sacrificed his life in the interests of geography and died a disappointed man because he wanted to find a northwest passage to China which would have been capital in sought in that city for the purpose of organizing a steamship line which would operate between Boston and the Pacific coast. The summer of 1609 he was here, and he has heretofore been occupied with railway transportation. His executive duties entailed an occasional appearance playing golf between New York and Boston. He is the executive whom Charles B. Mellen brought from Minnesota to Boston to aid Mr. Mellen in carrying out great plans for the unification of the New England railroad situation.

Mr. Byrnes must have been familiar with steamship navigation through the Great Lakes and perhaps gained by that experience knowledge which will make it all the easier for him to persuade Boston capital that the opportunity is excellent for establishing a steamship line operating between the Atlantic and the Pacific coast by way of the Panama canal. Reports have been circulated that the managers of a steamship company which has long been engaged in commerce between New York and the Pacific coast by way of the Panama isthmus and the railroad which crosses that isthmus have found it expedient to sell some of its steamships and to use the proceeds in making recommendations to congress in favor of modification of that law, should he find this advisable, certain facts will be brought to his attention which will reveal the magnitude of shipbuilding operations in the United States. Those who control shipyards do not desire to see the law of the Pacific coast to be so strict that they will be unable to build ships, but those who own and navigate ships, who will be affected, if there is any adverse effect by the law of the Pacific coast.

Shipbuilding Progress.
Two or three years ago American shipyards began to be built, occupied, partly because the belief was general that the opening of the Panama canal to navigation would greatly stimulate commerce. The advent of the European war seems not to have affected the shipbuilding business in the United States. The statistics which President Wilson will have at hand will show him that American shipyards are the largest of this year, under construction vessels designed for seaboard navigation built of steel or iron aggregating sixty, with a gross tonnage of over 1,000,000 tons, and that the president will have more striking figures than these before him when the details of the construction of vessels which are to navigate the Great Lakes are laid before him. As the so-called "Boo" canal has now for some years floated a greater tonnage than any other ship canal in the world—greater even than that of the Suez canal—also ship construction and the navigation of the Great Lakes represent the largest part of that in American waters.

Great people regard what important part the Great Lakes represent in the shipping industry in the aggregate of American commerce. The statistics which will be brought to his attention which will reveal the magnitude of shipbuilding operations in the United States. Those who control shipyards do not desire to see the law of the Pacific coast to be so strict that they will be unable to build ships, but those who own and navigate ships, who will be affected, if there is any adverse effect by the law of the Pacific coast.

Twenty-Five Innings Locals Are Blanked

Crackers Blanked Again; Rogers Uses Whitewash; Same Old Tale, No Hits

By Carl Taylor.

Tom Rogers effectively applied the whitewash brush to the Crackers yesterday afternoon, and the Vols took the first game of the series in easy style, 3 to 0. Rogers was the whole show at all times and held the Crackers down whenever they threatened.

Nashville won the game in the fourth frame when they counted two runs as the Crackers rarely ever come from behind and capture a game, and especially when they make a few runs in all occasions except one, when Roy Moran tripled to center and perched on third.

Crackers After Record?

It seems as if the hired crew of Bill Smith and company are out after the record for consecutive innings without counting a run. To date they have played twenty-five innings and the only thing they have accomplished is getting a runner to third. Far be it from me to discourage an ambitious record breaker, so we can't suggest that they make a few runs in all occasions except one, when Roy Moran tripled to center and perched on third.

That would be positively "crack."

After the fourth inning, when the Vols did not get a man to first, it was only a question of how much the final count would be, as the Crackers realized they were beaten. They were absolutely without pep and played listlessly.

Ferry, while twisting acceptable ball except in the fourth frame, was responsible for the Vols' two runs at a critical time and heaved away at a critical time and heaved away at a critical time and heaved away at a critical time.

Other features of the afternoon were four double plays, Atlanta making three of them. Ferry figured in two of them, although he was not directly connected with any of them. On both occasions he slowed down.
